EXAMINER'S REASONS FOR ALLOWANCE

1. Attorney J. Howard called 9/12/06 to discuss the Office Action mailed 5/26/06, specifically Claims 1 and 4. He argued that Hein fails to disclose "at least one of said elastic member, and first and second members, comprises a circumferentially-extending projection at an outer periphery".

Upon review, Examiner agreed, and withdraws the art rejections for these claims. Additionally, the 112 rejection re Claim 4 is also withdrawn (upon reconsideration, no issue exists; Examiner apologizes for the inconvenience).

Mr. Howard also confirmed that the drawing issues re "crosshatching" previously discussed, are resolved by his forthcoming submittal of replacement drawings with element 45 having alternately-heavy crosshatching, because it comprises an "elastic" material.

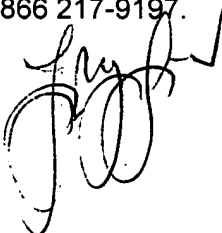

2. **Claims 1-4, 6-10, 12-15, 17-25 are allowable** because prior art does not disclose an electric power steering system comprising, *inter alia*,
an elastic member between first and second members, having
first and second torsional elastic moduli, the first being smaller than the second,
and a radially and axially extending plate-shaped portion,
wherein at least one of the elastic member, first and second members comprised a circumferentially-extending projection at an outer periphery.
